

Residential Heat Pump Rate Change Rebate Program General Information & Application

General Information

1. About the Program

- Once your heat pump is installed and accepted by the city, you are eligible to apply for the **Residential Heat Pump (RHP) rate**. This rate was developed specifically for you and is lower than the standard Residential Service (RS) rate on an annual basis.
- You may qualify for a rebate, if the heat pump installed meets minimum program requirements.
- Applying for the RHP rate and rebate are made by completing the application.
- For locations where multiple heat pumps are installed, an application must be completed for each unit.

2. About the Rebate

- A completed Form W-9 (IRS) is required in order to process the check for your rebate.
 - If desired you can wait till your application has been accepted to send the W-9.
- To qualify for the rebate, the heat pump selected must meet the following minimum rating standard:
 - **Air Source Heat Pumps**; Seasonal Energy Efficiency Ratio (SEER) of 18.0 or greater required.
 - **Ground Source Heat Pumps**; Energy Efficiency Ratio (EER) of 25.0 or greater is required.
- You may **not** have a 'dual fueled' heat pump which use: natural gas, LP gas, fuel oil, or wood burning furnaces as heat sources or auxiliary heat sources for cold weather operations. The use of a wood log, natural gas log, or LP (liquid propane) gas log in a fireplace is acceptable.

2. Permit Requirements

- Rebate payment will be remitted **only** after city code inspectors have approved the installation.
- The contractor must contact the Development Services at **405.742.8220** or **digitals@stillwater.org** to request a permit for the installation of the heat pump.
- After installation is complete, the permit holder must contact Development Services to inspect and approve the completed installation.

3. Documents Checklist

- You or contractor must complete the Heat Pump Rate Change / Rebate Program Application
- Provide the city with documents verifying the information about the heat pump installation.
- The application must be received by the City of Stillwater within 60 days of the date the unit was installed, or the site will be deemed ineligible for the rebate.

4. Amount of Rebate

- After verification that the heat pump and its installation comply with all requirements, a rebate will be made directly to you. After necessary receipts and verifications have been received, the rebate checks will take approximately three weeks to process. Rebates will be made as follows:
 - For an Air Source Heat Pump system, the city will rebate \$100 per ton of installed capacity.
 - For a Closed Loop, Ground Source Heat Pump system, the city will rebate \$200 per ton of installed capacity.

Attn. Rebate Program Manager Stillwater Electric Utility / 411 E Third Ave. Stillwater, OK 74074
Office: 405.742.8333

Heat Pump Rate Change / Rebate Program Application

To receive your rebate, follow the instructions below:

- Submit Completed Application Submit Contractor's Verification Statement for each rebate request.
- Photocopy of receipts for purchase (and installation) of each unit is required. The HVAC Contractor must complete the **Contractor's Verification Statement** with details of the system installed at the physical address.
- Attach a photograph(s) of the manufacturer's data plate legibly showing model number and serial number, etc., of the unit. For locations where multiple units are installed, a photograph of the manufacturer's data plate(s) for **each unit** is required. **The serial number on the Contractor's Verification Statement must match the serial number on the data plate photo.**
- If the application is not received within 60 days of the date the unit was installed then the site will be deemed ineligible for the rebate. Completed W-9 (Needed to generate rebate.)
