

**ELECTRIC RATE
GENERAL SERVICE (GS)
Revision 21**

- I. EFFECTIVE IN:** All areas served retail by Stillwater Electric Utility, hereinafter referred to as SEU, of the Stillwater Utilities Authority.
- II. AVAILABILITY:** Alternating current for use other than a residential dwelling unit. Service will be rendered at one location at one voltage. For service at transmission voltage, see Power and Light Rate schedule.

No resale, breakdown, auxiliary or supplementary service permitted, except as set forth in (A) below. Where commercial and residential services are served through one meter, the General Service Rate shall apply to the entire load.

- (A) Sales of charging services from an electric vehicle charging station, not owned by the SEU, for the purpose of fueling an electric vehicle, including the ability to sell on a kWh basis, shall not be considered resale of retail electricity, and such sales from the electric vehicle charging station shall not be subject to rate regulation by the Stillwater Utilities Authority.
- (B) Utility service to an electric vehicle charging station shall be provided subject to SEU's applicable rate schedule, terms, and conditions.
- (C) Electric vehicle charging station utility service will be provided under SEU's General Service Rate until an electric vehicle charging station rate is implemented.

The application of this rate schedule is limited to consumers meeting one of the following conditions: (1) The sum of the kWh's consumed during the 12 months ending with the current month, when divided by the sum of the monthly Maximum Demands during the 12 months ending with the current month, shall be equal to or less than 200. Consumers who are metered with equipment that does not measure monthly Maximum Demands are considered as having met the above condition. The Utility shall install metering equipment that measures monthly maximum Demands if, in its sole judgment, such equipment is necessary to determine whether the above condition has been met. (2) The sum of the kWh's consumed during the 12 months ending with the current month, when divided by the sum of the monthly Maximum Demand, during the 12 months ending with the current month, shall be greater than 200 and the monthly kWh consumed shall not exceed 15,000 kWh during each of 2 or more months (one month if only one month of billing is available) during the 12 months ending with the current month.

Service will be furnished in accordance with SEU Rules, Regulations, and Conditions of Service, and the Rules and Regulations of the City of Stillwater and the Stillwater Utilities Authority.

- III. CUSTOMER CHARGE:** \$18.04 per bill per month.
- IV. ENERGY CHARGE:**
 - SUMMER SEASON: All kWh per month at \$0.12894 per kWh.
 - WINTER SEASON: First 2000 kWh per month at \$0.12894 per kWh.

All additional kWh per month at \$0.08518 per kWh.

V. MINIMUM BILL: The minimum monthly bill shall be the Customer Charge as defined under this Rate Schedule. SEU shall specify a larger minimum monthly bill, calculated in accordance with SEU's Allowable Expenditure Formula in its Terms and Conditions of Service when necessary to justify the investment required to provide service.

VI. LATE PAYMENT CHARGE: A late payment charge in an amount equal to ten per cent (10%) of the total amount due on each monthly bill as calculated under this Rate Schedule or \$2,500, whichever is less, will be added if the bill is not paid on or before the due date stated on the bill. The due date shall be twenty-one (21) days after the bill is mailed.

VII. SAMPLE CALCULATION:

(A) SUMMER:

1. All kWh per month: multiply kWh X \$0.12894.
2. Multiply total kWh X PCA.
3. Total Steps 1 and 2.
4. Add monthly charge of \$18.04.
5. Multiply total of Step 4 by the applicable tax.

(B) WINTER:

1. First 2000 kWh per month: multiply kWh X \$0.12894
2. All Additional kWh per month: multiply kWh X \$0.08518.
3. Multiply total kWh X PCA.
4. Total Steps 1, 2 and 3.
5. Add monthly charge of \$18.04.
6. Multiply total of Step 4 by the applicable tax.

VIII. SERVICE LEVELS: Service at any nominal standard voltage of the City less than 2,000 volts with metering at less than 2,000 volts.

If SEU chooses to install its metering equipment on the primary side of the transformers, the kWh billed shall be **decreased** by the amount of the transformer losses calculated as follows:

0.55% of the total KVA rating of the transformers serving the customer times 730 hours.

IX. TERM: Open Order.

X. DEFINITIONS:

- A. **Production Cost Adjustment (PCA):** A factor determined by SEU and applied to the cost of energy used by the consumer to account for variations in the cost of generating or purchasing power.
- B. **Billing Month:** A period of approximately 30 days extending from the previous meter reading date to the present meter reading date
- C. **Summer Season:** The summer season shall include the customer usage months starting on May 1 and ending on September 30.

- D. **Winter Season:** The winter season shall be the customer usage months starting on October 1 and ending on April 30.
